Show in **Primary Briefing**

Show in **Appendix (DARK NOTAM)**

Tag not applicable for NOTAM type

How this works

- Four different **types** of NOTAM: 3 Airport types and FIR. Each type has different rules for NOTAM display.
- The PDF briefing has two sections: **Primary** and **Appendix**. - All dep/dest/alt NOTAMS go in Primary section
- Less critical NOTAMS go to the **Appendix (DARK NOTAMS)**

This is a **Baseline setting**: all changeable by operator
